

# MOSAIC

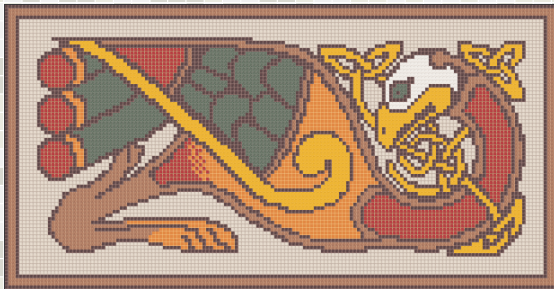

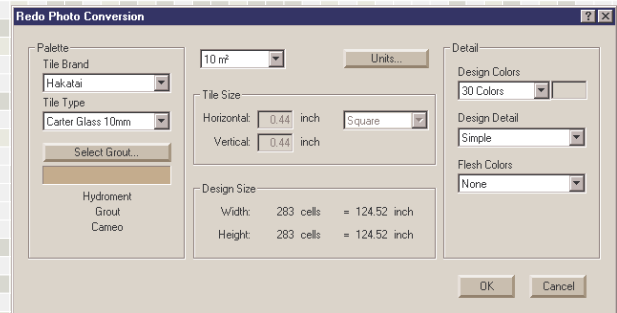

Makes designing with tiles quick and easy!

**MOSAIC 2005** has just been released with many new features!

## Some of Mosaic's new features are:

### ➤ Photo Conversion & Imports

Mosaic 2005 has many improved photo conversion features. There is now a choice of grout options, an extra scan size has been added and you can choose grey or sepia conversions. Mosaic also has a redo photo conversion command. This allows you to make any changes to your photo conversions quickly and efficiently.

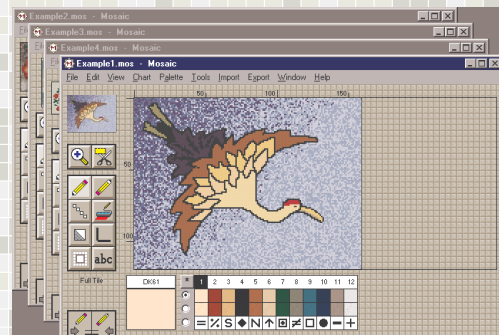

### ➤ Improved Simulation

Not only does Mosaic now have improved simulation of your charts but you can also view Grout color in simulation. This gives you a much clearer idea of what your finished design will look like.

### ➤ Multiple Document Interface

Mosaic now allows you to view two or more charts at once, making it easier to compare different designs and copy motifs from one to another.

## Other New Features Include:

- Grout Colors Added
- New Tile Ranges Added
- Gradient Fills
- Rotate Whole Chart
- Easy Access PDF Manual Help
- Total Tiles in Design shown in Palette Info
- Right Click Menus
- Print Kit
